The City Traffic Control Division will be upgrading the traffic signal installations on US 77 (Classen Boulevard) at the two State Highway 9 ramp intersections. Currently, both intersections are operated from a single controller located at the north intersection. This makes routine maintenance rather complicated as a technician at the cabinet at the north intersection cannot see the signal heads at the south intersection. To alleviate this problem, the City of Norman will be installing an additional traffic signal controller at the south intersection. This work will take place on Thursday, December 26, 2013, weather permitting. After 9:00 a.m. on December 26th, the intersections will be temporarily controlled by all-way STOP signs. Signal operation will be restored at both intersections before 3:00 p.m. on December 26th. Any questions about the project can be directed to Mr. David Riesland, City Traffic Engineer, at 329-0528.
